## Staff Report

**TO:** Planning Commission  
**FROM:** Jennifer L. Dam, AICP, Planning Director  
**DATE:** May 24 2021  
**SUBJECT:** Fremont Technology Park Revised Preliminary Plat

---

**Recommendation:** Recommend approval to City Council

---

### Background:

This is a request for a revised preliminary plat expanding the number of lots in the Fremont Technology Park. It is associated with a revised final plat.

The City Council reviewed this item on May 11, 2021. At that time the City Council voted 6-1 (Yerger, Kuhns, Jensen, Sookram, Ganem and Gibson voting aye and Legband voting nay) to send the preliminary and final plats back to the Planning Commission to review with changes showing the property on the east side of Buckingham Circle/Road (previously Lots 10-14) as a part of Outlot A.

The Preliminary and Final Plats have been revised to show the requested change.

The Planning Commission is required to review and make a recommendation to the City Council on the revised preliminary plat.

The Planning Commission held a public hearing on the original preliminary plat on April 19, 2021 and voted 9-0 to recommend approval.

The Public Works Director has requested the preliminary and final plat be revised to reflect a 50- foot wide outlot on the south, 25' wide drainage easements between Lots 12 and 13 Block 3 and 9 and 10, Block 3; and Lots 3 and 4, Block 3. Revisions to the size and location of utilities have been provided to Olsson, as well.

The revisions requested by the Public Works Director are being added to the Preliminary Plat.

The City Council approved the Fremont Technology Park Preliminary Plat and the Fremont Technology Park final plat in October, 2013. The Fremont Technology Park Replat of Outlot A was approved in December, 2014. The Fremont Technology Park Replat of Outlot B, administrative plat was approved in April, 2020. The Fremont Technology Park 1<sup>st</sup> Addition Replat of Outlot B and Lot 2 and Lot 3, administrative plat, was approved in December 2020. The Fremont Technology Park 2<sup>nd</sup> Addition, administrative plat, was approved in March, 2021.

The revised preliminary plat extends 29<sup>th</sup> Street and establishes cul-de-sacs for Oxford Circle and Buckingham Circle. The preliminary plat contains 21 lots and an outlot. The outlot contains a 100 foot wide detention cell on the east perimeter of the property and a 40 foot wide drainage buffer on the south end of the property.

The drainage study and drainage plan have been revised to reflect the new layout.

The base floodplain elevation at the Rawhide Creek has been determined to be 1184 at the curve of the creek at the south end of the property and 1185 toward the west end of the property. There is known flooding in the area, recommendations for the Hidden Brook and Fountain Springs subdivisions were to elevate structures two feet above the base flood elevation. The plat should be revised to reflect the base flood elevations.

The plat otherwise meets the requirements of Section 11-700 of the UDC.

## Memo

To: Jennifer Dam  
Director of Planning  
From: David Goedeken, P.E.  
Director of Public Works/City Engineer  
Topic: Engineering Review  
Fremont Technology Park 3<sup>rd</sup> Addition, Public Improvement Submittals  
Dated: April 15, 2021

I have reviewed the submittals for this Addition. The plat is for the tract of land bordered by the Rawhide Creek on the South, Proposed 32<sup>nd</sup> Street on the North, Yager Road on the West and Central Park on the East. The Plans submitted were the, Grading Plans, Utility and Public Improvement Layouts, and Drainage Plans and Calculations. The majority of the submittals were prepared by Olsson and Associates. The development is owned by the City of Fremont. The Fremont Engineering Department has been tasked with the design of the public improvements and these plans are in the Engineering Department under design.

- The plat is located inside city limits.
- The interior streets in the development will be paved in accordance of the UDC. The recommended width of streets will be 36 feet, as shown on the public improvement plans.
- Storm sewer and drainage plans have been submitted and reviewed. The public improvements in the development have been designed to drain as much runoff into the proposed detention cell on the Eastern edge of the site. Ultimately the majority of runoff will flow into the Rawhide Creek the remaining portion will drain into the unnamed drainageway on the Northern edge of the development. For more specific hydraulic information I would refer you to the Drainage Study dated April 6, 2021 as prepared by Olsson and Associates.
- Water, Sewer, Gas, and Electric will be supplied by the City of Fremont. Water and Sewer are partially installed on the site. The City's design plans will complete the water and sewer layouts in the subdivision.

### Final Comments:

- The submittals received on 4/15/2021 from the Planning Department contain some errors in locations of the proposed and existing utilities. The Engineering Department has submitted the most up to date locations and sizes of utilities to the Planning Department and Olsson Associates for clarification.
- Engineering Staff further recommends there be additional storm drainage easements at the following locations.
  - 25 foot drainage easement along property line of Lots 12 and 13, Block 3.
  - 25 foot drainage easement along property line of Lots 9 and 10, Block 3.

- 25 foot drainage easement along property line of Lots 3 and 4, Block 3.
- Outlot A along the Southerly line of Lots 3, 4, 9, and 10, Block 3 is shown as 40 feet in width on the Final Plat. Page 7 of the Drainage Study recommends a 3:1 embankment slope and a 20 foot wide buffer/no fill zone adjacent to the Rawhide Creek. The Creek appears to be roughly 8 feet deep by the contour lines shown on the Grading Plan. At a 3:1 slope this would require 24 feet for the slope plus a 20 foot wide buffer from the bed of the creek. That totals up to a minimum of 44 feet. However, the exact location of the creek bed meanders North and South relative to the Outlot line. I would recommend the width of Outlot A be increased to 50 feet to provide adequate clearance.

## Staff Report

**TO:** Planning Commission  
**FROM:** Jennifer L. Dam, AICP, Planning Director  
**DATE:** May 24, 2021  
**SUBJECT:** Fremont Technology Park Replat 3 Final Plat

---

**Recommendation:** Recommend Approval to City Council

---

### Background:

This is a request for a final plat expanding the number of lots in the Fremont Technology Park. It is associated with a revised Preliminary Plat.

The plat has been revised to show the lots on the east side of Buckingham Circle/Road included in Outlot A as requested by the City Council on May 11, 2021 during the discussion on the Preliminary Plat.

The Planning Commission is required to review and make a recommendation on the revised plat.

The Planning Commission held a public hearing and recommended approval 9-0 on April 19, 2021.

The City Council approved the Fremont Technology Park Preliminary Plat and the Fremont Technology Park final plat in October, 2013. The Fremont Technology Park Replat of Outlot A was approved in December, 2014. The Fremont Technology Park Replat of Outlot B, administrative plat was approved in April, 2020. The Fremont Technology Park 1<sup>st</sup> Addition Replat of Outlot B and Lot 2 and Lot 3, administrative plat, was approved in December 2020. The Fremont Technology Park 2<sup>nd</sup> Addition, administrative plat, was approved in March, 2021.

The final plat is consistent with the Preliminary Plat.

A subdivision agreement is not required as the City is the subdivider.
